

LIBROS RECIBIDOS

Agassi, J.: *Popper and His Popular Critics. Thomas Kuhn, Paul Feyerabend and Imre Lakatos*, Springer, New York, 2014, pp. 153.

Contents: Part I, Prelims 1: On Human Rules About God's World. Bibliography. 2 In Search for Rules. Bibliography. 3 Rules Against Mock-Criticism. Bibliography. 4 Rules Against Excessive Defensiveness. 4.1 Let a Thousand Flowers Bloom. 4.2 The Evasion of Criticism. 4.3 Popper for Criticism in Science. 4.4 Lakatos Against Criticism in Science. 4.5 Feyerabend Against Method. 4.6 Kuhn for Constructive Criticism. Bibliography. 5 Against the Bouncers at the Gates of Science. Bibliography. 6 Duhem, Quine and Kuhn, and Incommensurability. Bibliography. Part II Popper and His Popular Critics 7 Karl Raimund Popper (1902–1994). 7.1 Life and Works. 7.2 A Fallibilist Theory of Rationality. 7.3 A Fallibilist Theory of Logic. 7.4 Between Science and Metaphysics. 7.5 Philosophy of Science. 7.6 Social and Political Philosophy. 7.7 Optimism. Bibliography. 8 Kuhn's Way. 8.1 Glossing Over Criticism Creates Confusion. 8.2 The Scientific Tradition Encourages Glossing Over Criticism. 8.3 Kuhn Used Commonsense to Fill Gaps in His Philosophy. 8.4 Conant Influenced Kuhn Significantly. 8.5 Conant's View of Criticism Is Conservative. 8.6 Hempel Failed to Reconcile Kuhn with Rationalism. 8.7 Kuhn Borrowed Traditionalism from Polanyi. 8.8 Kuhn Borrowed Incommensurability from Duhem. 8.9 The Consensus Is a Complex Matter. 8.10 Kuhn's Incommensurability Is Redundant at Best. 8.11 Kuhn's Critique of Approximationism Is Disappointing. 8.12 Kuhn Had No Theory of Truth. 8.13 Kuhn Had No Theory of Meaning. Bibliography. 9 Feyerabend's Proposal. 9.1 Preliminaries. 9.2 The Ethics of the Matter. 9.3 Science as a Social Phenomenon. 9.4 Science and the General Public. 9.5 Feyerabend's Proposal. 9.6 Towards an Institutional Analysis of Science. Bibliography. 10 Imre Lakatos. 10.1 Works. Bibliography. 11 A Touch of Malice. 11.1 The Lectures. 11.2 In Praise of Destructive Criticism. 11.3 The Correspondence. 11.4 Inaccuracies. 11.5 Conclusion. Bibliography. Part III In a Nutshell 12 The Essential Popper. 12.1 Fallibilism. 12.2 Democracy. 12.3 Methodological Essen-

tialism. 12.4 Anti-metaphysics. Bibliography. 13 Kuhn on Pluralism and Incommensurability. Bibliography. 14 Paul Feyerabend and Rational Pluralism. Bibliography. 15 Lakatos on the Methodology of Scientific Research Programs. 15.1 The Need to Assess Research Projects and Programs. 15.2 Tradition Against Research Assessments. 15.3 The Pedigree Theory and the Hic Rhodos Theory. 15.4 Is Methodology Ineffable or Rational? 15.5 The Rational Way to Assess Frameworks. 15.6 Progressive and Degenerative Problem-Shifts. Bibliography. 16 Epilogue: Civilization and Its Self-defense. Bibliography. Appendix 1: The Biological Base of Dogmatism. Appendix 2: Popper on Explanation. Bibliography. Author Index. Subject Index.

Reiss, J.: *Causation, Evidence, and Inference, Routledge Studies in the Philosophy of Science*, Routledge, Taylor & Francis Group, New York, 2015, pp. 253.

Contents: 1 Causation in a Complex World. Part I Evidence. 2 What's Wrong with Our Theories of Evidence? 3 Evidence in Context. Part II Singular Causation. 4 Counterfactuals, Thought Experiments, and Singular Causal Inference in History. 5 Counterfactuals in the Social Sciences. 6 Contrastive Causation. 7 Singular Causation without Counterfactuals. Part III Causal Laws. 8 Time Series, Nonsense Correlations, and the Principle of the Common Cause. 9 Causal Laws in Biomedical and Social Research: Evidence, Inference, and Purpose. Part IV: Semantics 10 Third Time's a Charm: Causation, Science, and Wittgensteinian Pluralism. 11 Causation in the Biomedical and Social Sciences: An Inferentialist Account. References. Index.

Lihoreau, F y Rebuschi, M. (Ed.): *Epistemology, Context, and Formalism. Synthese Library Studies in Epistemology, Logic, Methodology, and Philosophy of Science*, vol. 369, Springer International Publishing Switzerland, 2014, pp. 245.

Contents: 1 Introduction. (Franck Lihoreau and Manuel Rebuschi). 2 Context as Assumptions. (Erich Rast). 3 Knowledge and Disagreement. (Martin Montminy). 4 A Contradiction for Contextualism? (Peter Baumann). 5 Epistemic Contexts and Indexicality. (Yves Bouchard). 6. Knowing Who: How Perspectives and Context Interact. (Maria Aloni

and Bruno Jacinto). 7 Knowledge Attributions in Context of Decision Problems. (Robert van Rooij). 8 How Context Dependent Is Scientific Knowledge? (Sven Ove Hansson). 9 Action, Failure and Free Will Choice in Epistemic stit Logic. (Jan Broersen and John-Jules Charles Meyer). 10 Belief, Intention, and Practicality: Loosening Up Agents and Their Propositional Attitudes. (Richmond H. Thomason). 11 Character Matching and the Locke Pocket of Belief. (Gregory Wheeler). 12 A Modal Logic of Perceptual Belief. (Andreas Herzig and Emiliano Lorini). 13 Hyperintensionality and De Re Beliefs. (Paul Égré). 14 Knowledge Is Justifiable True Information. (Jaakko Hintikka).

Ken, A y Abasnezhad, A. (Ed.): *Vague Objects and Vague Identity. New Essays on Ontic Vagueness, Logic, Epistemology, and the Unity of Science*, Vol. 33, Springer, 2014, pp. 353.

Contents: 1 Introduction. (Ken Akiba). Part I Mereological Vagueness. 2 Mereological Indeterminacy: Metaphysical but Not Fundamental. (Thomas Sattig). 3 A Linguistic Account of Mereological Vagueness. (Maureen Donnelly). Part II Varieties of Ontic Vagueness. 4 Vague Objects in Quantum Mechanics? (George Darby). 5 Vague Persons. (Kristie Miller). 6 Indiscriminable but Not Identical Looks: Non-vague Phenomenal Predicates and Phenomenal Properties. (Elisa Paganini). 7 Attitudes, Supervaluations, and Vagueness in the World. (Ángel Pinillos). Part III Formal Issues 8 Boolean-Valued Sets as Vague Sets. (Ken Akiba). 9 One Bald Man... Two Bald Men... Three Bald Men —Aahh Aahh Aahh Aahh Aaaahhh! (Nicholas J.J. Smith). 10 Vagueness and Abstraction. (Stewart Shapiro). Part IV Ontic Supervaluationism. 11 Vagueness in the World: A Supervaluationist Approach. (Ali Abasnezhad and Davood Hosseini). 12 What Could Vague Objects Possibly Be? (Dan López de Sa). Part V Vague Identity. 13 Some Comments on Evans's Proof. (Brian Garrett). 14 Vague Existence Implies Vague Identity. (David B. Hershenov). 15 Castles Built on Clouds: Vague Identity and Vague Objects. (Benjamin L. Curtis and Harold W. Noonan). 16 Evans Tolerated. (Elia Zardini). Index.

Marcum, A. J.: *Thomas Kuhn's Revolutions. A Historical and an Evolutionary Philosophy of Science?*, Bloomsbury Academic, 2015, pp. 279.

Contents: I. Preface. II. Acknowledgments. The road to Structure. III. Part one. 1 Who was Thomas Kuhn? 2 How did Kuhn arrive at Structure? Kuhn's historical philosophy of science. IV. Part two. 3 What is The Structure of Scientific Revolutions? 4 Why did Kuhn revise Structure? Kuhn's paradigm shift. VI. Part three. 5 What was Kuhn up to after Structure? 6 What is Kuhn's evolutionary philosophy of science? Kuhn's impact. VII. Part four. 7 What is Kuhn's impact on the history and philosophy of science and on the natural sciences? 8 What is Kuhn's impact on the behavioral, social, and political sciences? VIII. Epilogue. IX. Notes. X. Bibliography. XI. Index.

Stump, J. D.: *Conceptual Change and the Philosophy of Science, Alternative Interpretations of the A Priori*, Routledge Studies in the Philosophy of Science, Routledge, New York, 2015, pp. 171.

Contents: I. List of Figures. II. Preface. III. Acknowledgments. 1 Introduction: Theories of the Constitutive Elements in Science. 2 Reinventing Geometry as a Formal Science. 3 Poincaré's Conventionalisms. 4 The Logical Empiricist or Positivist Engagement with A Priori Knowledge: Schlick, Reichenbach, Carnap, and Ayer. 5 Alternative Conceptions of the A Priori: Cassirer, Lewis, and Pap. 6 The Status of Newton's Laws. 7 Conceptual Change and the Constitutive Elements of Science: Kuhn, Friedman, and Hacking. 8 On the Role of Mathematics in Physical Theory. 9 Epilogue: A Pragmatic Theory of the Constitutive Elements in Science. IV. Index.

Franklin, F.: *An Aristotelian Realist Philosophy of Mathematics, Mathematics as the Science of Quantity and Structure*, Palgrave Macmillan, 2014, pp. 305.

Contents: I. List of Figures. II. List of Tables. III. Introduction Part I The Science of Quantity and Structure. 1 The Aristotelian Realist Point of View. The reality of universals Platonism and nominalism. The reali-

ty of relations and structure. 'Unit-making' properties and sets. Causality. Aristotelian epistemology. 2 Uninstantiated Universals and 'Semi-Platonist' Aristotelianism. Determinables and determinates. Uninstantiated shades of blue and huge numbers. Possibles by recombination? Semi-Platonist Aristotelianism. 3 Elementary Mathematics: The Science of Quantity. Two realist theories of mathematics: quantity versus structure. Continuous quantity and ratios. Discrete quantity and numbers. Discrete quantity and sets. Discrete and continuous quantity compared. Defining 'quantity'. 4 Higher Mathematics: Science of the Purely Structural. The rise of structure in mathematics. Structuralism in recent philosophy of mathematics. Abstract algebra, groups, and modern pure mathematics. Structural commonality in applied mathematics. Defining 'structure'. The sufficiency of mereology and logic. Is quantity a kind of structure? 5 Necessary Truths about Reality. Examples of necessity. Objections and replies. 6 The Formal Sciences Discover the Philosophers' Stone. A brief survey of the formal or mathematical sciences. The formal sciences search for a place in the sun. Real certainty: program verification. Real certainty: the other formal sciences. Experiment in the formal sciences. 7 Comparisons and Objections. Frege's limited options. The Platonist/nominalist false dichotomy. Nominalism. Constructions in set theory. Avoiding the question: what are sets? Overemphasis on the infinite. Measurement and the applicability of mathematics. The indispensability argument. Modal and Platonist structuralism. Epistemology and 'access'. Naturalism: non-Platonist realisms. 8 Infinity. Infinity, who needs it? Paradoxes of infinity? 'Potential' infinity? Knowing the infinite. 9 Geometry: Mathematics or Empirical Science? What is geometry? Plan A: multi-dimensional quantities. What is geometry? Plan B: the shapes of possible spaces. The grit-or-gunk controversy: does space consist of points? Real non-spatial 'spaces' with geometric structure. The space of colours. Spaces of vectors. The real space we live in. Non-Euclidean geometry: the 'loss of certainty' in mathematics? Part II Knowing Mathematical Reality. 10 Knowing Mathematics: Pattern Recognition and Perception of Quantity and Structure. The registering of mathematical properties by measurement devices and artificial intelligence. Babies and animals: the simplest mathematical perception. Animal and infant knowledge of quantity. Perceptual knowledge of pattern and structure. 11 Knowing Mathematics: Visualization and Understanding. Imagination and the uninstantiated. Visualization for understanding structure. The return of visualization, and its neglect. Why visualization has been persona non

grata in the philosophy of mathematics. The mind and structural properties: the mysteriousness of understanding. The chiliagon and the limits of visualization. 12 Knowing Mathematics: Proof and Certainty. Proof: a chain of insights. Symbolic proof 'versus' visualization: their respective advantages. Proof: logicist, 'if-thenist' and formalist errors. Axioms, formalization and understanding. Counting. Knowing the infinite. 13 Explanation in Mathematics. Explanation in pure mathematics. How do pure mathematical explanations fit into accounts of explanation? Geometrical explanation in science. Non-geometrical mathematical explanation in science. Aristotelian realism for explanatory success. 14 Idealization: An Aristotelian View. Applied mathematics without idealization. Approximation with simple structures, not idealization. Negative and complex numbers, ideal points, and other extensions of ontology. Zero. The empty set. 15 Non-Deductive Logic in Mathematics. Estimating the probability of conjectures. Evidence for (and against) the Riemann Hypothesis. The classification of finite simple groups. Probabilistic relations between necessary truths? The problem of induction in mathematics. IV. Epilogue: Mathematics, Last Bastion of Reason. V. Notes. VI. Select Bibliography. VII. Index.

Publicaciones 2013

CDCH-UCV

• Altez, Yara
LA ESTRUCTURA HERMENÉUTICA DEL CONOCIMIENTO ANTROPOLÓGICO

• Briceño-Iragorry, Leopoldo y Gastón Calcaño Loynaz (†)
CIRUGÍA PEDIÁTRICA. Vols. I y II (2°. edición)

• Guerra, José
REGÍMENES MONETARIOS, POLÍTICA MONETARIA E INFLACIÓN EN VENEZUELA

• Guevara Díaz, José Manuel
MÉTODOS DE ESTIMACIÓN Y AJUSTE DE DATOS CLIMÁTICOS (1°. reimpresión)

• Martínez, Ana Beatriz y Nayesía Hernández (Compiladoras)
TEORÍA Y PRÁCTICA DE LAS COMUNIDADES VIRTUALES DE APRENDIZAJE

• Reyes Romero, Heberto, Pedro Navarro Rojas y Heberto Reyes Barrios
MEDICINA TROPICAL Y ENFERMEDADES DEL VIAJERO. Tomos I y II (1°. reimpresión)

• Rosales, Elsie, Carmelo Borrego y Gilda Núñez
SISTEMA PENAL Y ACCESO A LA JUSTICIA (2°. edición)

Nuestras publicaciones pueden ser adquiridas en el Departamento de Relaciones y Publicaciones del Consejo de Desarrollo Científico y Humanístico, ubicado en la Av. Principal de La Floresta, quinta Silenia, La Floresta, Caracas.

Teléfonos: 286.8648 - 605.0048 (Directos) - 284.7077 - 284.7666

Fax: Ext. 244

E-mail: publicaciones@cdch-ucv.net

Igualmente, están disponibles en Ventana UCV, la nueva librería ucevista, ubicada en la planta baja del edificio de la Biblioteca Central.

COMISIÓN DE ESTUDIOS DE POSTGRADO FHE-UCV

La Comisión de Estudios de Postgrado de la Facultad de Humanidades y Educación de la Universidad Central de Venezuela ofrece un conjunto de postgrados adaptados a las exigencias de un mercado profesional competitivo.

Cursos de Ampliación

Doctorados

Educación
Estudios del Discurso
Filosofía
Humanidades
Historia
Psicología

Especializaciones

Bibliotecología
Comunicación Social
Educación
Lingüística
Psicología

Maestrías

Artes
Bibliotecología
Comunicación Social
Educación
Filosofía
Geografía
Historia
Letras
Lingüística
Psicología

Requisitos de ingreso

- Copia del título de licenciado o su equivalente.
- Copia de la certificación de notas
- Copia de la constancia de promedio y puesto de promoción
- Currículum vitae actualizado, con sus respaldos
- Una foto de frente, reciente, tamaño carnet
- Una copia ampliada de la cédula de identidad, en papel tamaño carta (sin recortar)
- Cancelar el arancel de **seis (6) unidades tributarias** (por concepto de pre-inscripción).
- Las copias de los títulos y notas obtenidos en el exterior deberán estar debidamente legalizadas ante el respectivo consulado de Venezuela. Si están en idioma extranjero, deberán ser traducidos al idioma español por intérprete público autorizado

Los postgrados de la FHE están diseñados para el desarrollo de competencias modeladas a las necesidades actuales

INFORMACIÓN

Dirección:

Oficina de Control de Estudios de Postgrado de la Facultad de Humanidades y Educación, Centro Comercial Los Chaguaramos, Piso 5. Ofc. 5-7.

Teléfonos:

605-0323 / 0325/ 0484/ 0485.

Atención al público:

De 1:30 pm a 3:30 pm.

PARA LA PRESENTACION DE ORIGINALES

Autor: Apellido completo e inicial del nombre separados por coma. Desde la segunda vez en adelante sólo Apellido. En ambos casos seguido por coma.

Título de libros y revistas: En cursiva.

Título de los artículos aparecidos en revistas, de ensayos publicados en obras colectivas, de capítulos o partes de libros: Entre comillas « ».

Entre los diversos datos: Puntuación únicamente con comas.

Para los libros, indicar a continuación: Lugar de edición, editorial, año de edición, eventualmente el año de la primera edición entre paréntesis.

Para las revistas y toda publicación periódica, indicar a continuación número del volumen, seguido por año entre paréntesis, tomo y número o fascículo. Además, si la revista no es conocida, póngase después del título, entre paréntesis, el nombre de la ciudad e institución donde se publica.

Abreviatura de páginas: p. (si una sola), pp. (si dos o más), p. y ss. (si se reenvía a una parte).

Volúmenes o tomos: Indicar en forma abreviada “vol.” o “t.” seguido del número romano.

Para las notas, si se trata de una cita textual, póngase directamente autor, título, etc.. Si se trata de una referencia, póngase Cf. Autor, título, etc. Lo mismo vale para un texto ya referido.

Si la nota que sigue hace referencia al mismo autor y al mismo ensayo u obra, póngase sólo *Ibidem* (en cursiva), si se trata de la misma página; *Ibid.* seguido de coma y p. ó pp. y número de la página o páginas, si ésta es diferente.

Si el texto que se cita está en un volumen que recoge varios ensayos o en una obra colectiva, se pondrá la preposición ‘ en ‘ seguida del apellido e inicial del nombre y, entre paréntesis, (Ed.) o (Coord.). Si el autor del artículo y el editor o compilador coinciden, póngase (Id.).

Cuando se vuelva a citar un texto ya identificado, póngase el apellido del autor, el título abreviado (las tres primeras palabras) seguido por ..., cit., y las páginas.

Eventuales bibliografías irán por orden alfabético de apellidos.

Las citas deben estar insertadas en el texto y entre comillas. Si tienen más de tres líneas, pónganse como nuevo párrafo, con un reducido espacio entre los renglones, en letra un punto más pequeño y dejando tres (3) espacios en los dos márgenes.

Para indicar omisión de palabras o de pasajes: póngase tres puntos entre corchetes [...].
